

AIRTEK MATTRESS COVER

AIRTEK 3D high- transpiration fabric mattress bag cover, which can be removed in 2 separate parts and washed in a machine at up to 40°. Ideal for the summer and for anyone who tends to perspire heavily during the night.

AIRTEK: A three-dimensional fabric that lets large quantities of air pass through. After extensive studies into normal fabrics, the researchers have constructed machines able to weave millions of micro-threads joined together in a vertical and parallel grid. Hence the first fabric that lets 20 times more air pass through than a normal fabric.

DETAIL OF THE ZIP: a removable and dividable cover system that can be machine washed up to 40°.

2 DIFFERENT WAYS TO USE:

WINTER

We recommend putting Airtek inside the mattress lining, so that it creates an air chamber that eliminates the moisture from inside the mattress.

SUMMER

We recommend putting Airtek outside the mattress lining, as it helps prevent perspiration and lets the air pass through to create an effective and totally cool environment.

AIRTEK MATTRESS COVER

CERTIFICATIONS

OEKO TEX STANDARD 100 certifies that the products pose no risk to human health and the environment because they contain no toxic substances. The certificate ensures that the products are manufactured in compliance with the requirements of the European ecological standards.

MATERIALS & TECHNOLOGIES

3D Fabric: Special three-dimensional fabric formed by thousands of micro-springs. This fabric creates a breathability system that can eliminate moisture.

Health product: This mark certifies the product is non-toxic and healthy, containing no toxic substances for human health.

Airtek: A three-dimensional fabric that lets large quantities of air pass through. After extensive studies into normal fabrics, the researchers have constructed machines able to weave millions of micro-threads joined together in a vertical and parallel grid. Hence the first fabric that lets 20 times more air pass through than a normal fabric.

Washable: Cover designed to be machine washed with mild detergents at the temperatures mentioned above.

Removable cover: The mattress cover has a zip so that it can be removed and washed.

Hypoallergenic: symbol that guarantees the reduction of bacteria and mites in the bed.
